Curriculum Vitae

I am a young webdesigner and developer interested in any kind of design and user experience, not only on web.

I have been dropped into the world of web and design in 2000. Currently I am using Adobe Photoshop and Illustrator for designing websites and build them from scratch with hand-made HTML(5) and CSS(3). I'm open minded and have the ability to learn fast. Design is not only my job but it's also my main interest – an addiction.

My dream is to be a member of a creative team where I can improve my skills as well as making my team successful. I am a good team worker and I prefer personal contact to online cooperation. I am not afraid of paper and pencil. I am also interested in everything what needs experimenting, structural thinking and creativity.

In terms of my freetime, I simply can not list how many things I like to do. I am very open-minded.
